TREE, WATER AND EARTH ENERGY DOWSING RESEARCH PROJECT 2026

The aim of this dowsing research project is to explore different aspects of tree, water, and earth energies and to investigate whether the different aspects are related, as well as how they are affected by the Solar Noon transition period (the 20-minute period leading up to Solar Noon) and the mid-afternoon transition period (3pm to 3:15pm).

The project at Newstead will be led by Mave Calvert, and all sessions will be carried out in the parkland surrounding Newstead Abbey in Nottinghamshire. Other individuals and groups have expressed interest in carrying out parallel research in other locations, which will allow us to compare our findings.

Newstead Abbey is managed by Nottingham City Council. There is a large amount of woodland, parkland, formal gardens and bodies of water there as well as café and toilet facilities, making it ideal for a dowsing project. The main entrance is situated on the A60 between Nottingham and Mansfield, and it is easily accessed from Junction 27 of the M1.

The sessions are free of charge. Notts County Council charge £7 per car to park at Newstead Abbey. Dowsers are welcome to participate in as many of these events as they wish. Each will have its own theme, so it is not necessary to attend them all.

The Sat Nav postcode for the car park is NG15 9HJ. The café, toilets and grounds are open from 10am to 4pm daily. We will meet at the café around 10:30am each time to get to know each other and discuss the project, aiming to start dowsing around 11:15am, Lunch break will be around 1:15pm depending on the time of Solar Noon that day. You can bring a picnic or eat in the café. We will start dowsing again around 2:15pm and we will return to the café by 3:30pm for a final cuppa and to discuss the day's dowsing.

The project will take place for six sessions on the 2nd Saturday of the month between April and September 2026 with an option of two extra sessions to explore how the features that we have dowsed are affected by the Summer Solstice and Autumn Equinox energies:

Saturday 11 th April 2026	Solar Noon 13:05 pm
Saturday 9 th May 2026	Solar Noon 13:01 pm
Saturday 13 th June 2026	Solar Noon 13:04 pm
Sunday 21 ^s June 2026	Summer Solstice Solar Noon 13:06 pm
Saturday 11 th July 2026	Solar Noon 13:10 pm
Saturday 8 th August 2026	Solar Noon 13:10 pm
Saturday 12 th September 2026	Solar Noon 13:01 pm
Wednesday 23 rd September 2026	Autumn Equinox Solar Noon 12:57 pm

If you wish to participate, please email me at dowsingsherwood@gmail.com

TREE, WATER AND EARTH ENERGY DOWSING RESEARCH PROJECT 2026

This is a provisional outline for each of the sessions, subject to change depending on our findings and ideas that people come up with:

Saturday 11th April 2026 THEME: TREE ENERGIES

Solar Noon 13:05 1 day after Last Quarter (Half Moon)

We will explore the energy fields of trees and the structure of the energy lines that connect trees together. We will investigate how the trees and connecting energy lines are affected by the playing of music, drumming and chanting as well as the Solar Noon and mid-afternoon transition periods.

Saturday 9th May 2026 THEME: WATER ENERGIES

Solar Noon 13:01 Last Quarter (Half Moon) 22:11

We will locate some blind springs and water veins that run from them, exploring their energetic structure, water depths and flow rates. We will also locate some of the smaller vortices that are associated with blind spring networks. We will explore how these energetic features behave during the Solar Noon and mid-afternoon transition periods and whether the water depth and flow rate changes at all during these periods.

Saturday 13th June 2026 THEME: EARTH ENERGIES

Solar Noon 13:04 5 days after New Moon

We will locate the earth energy dragon currents that flow through the area and explore their structure in terms of the number of bands that they are comprised of. We will take Bovis readings for each band and explore its width, colour frequency and Yin/Yang polarity, We will also take readings of how much beneficial/detrimental energy these flows are carrying and see whether this is affected by the Solar Noon and mid-afternoon transition periods.

Sunday 21st June 2026 THEME: SUMMER SOLSTICE

Solar Noon 13:06 Summer Solstice 09:24am

The day prior to the Solstices and Equinoxes is said to be a harmony day when earth energy lines come into sync with one another and the energetic features surrounding blind springs widen out for several days. We will explore whether the tree, water and earth energies that we dowsed in the previous sessions change during the Summer Solstice period and whether this affects their behaviour during the Solar Noon and mid-afternoon transition periods.

TREE, WATER AND EARTH ENERGY DOWSING RESEARCH PROJECT 2026

Saturday 11th July 2026 THEME: BEACON TREE ENERGIES

Solar Noon 13:10 4 days after New Moon

We will locate a Beacon Tree and its associated Beacon spring, and explore their energies, how they relate to underground water and how they are connected to other trees in the area. We will also explore how the energies of the Beacon Tree behave during the Solar Noon and mid-afternoon transition periods.

Saturday 8th August 2026 THEME: LANDSCAPE PENTAGRAM ENERGIES

Solar Noon 13:10 2 days after New Moon

The south-west tip of the Sherwood Forest landscape pentagram is located at Newstead. We will dowse for the exact location of this tip and explore its energetic structure, and any lines of energy emanating from it. We will also explore whether this feature and any related lines of energy are affected by the playing of music, drumming and chanting as well as the Solar Noon and mid-afternoon transition periods.

Saturday 12th September 2026 THEME: NEW MOON ENERGIES

Solar Noon 13:01 New Moon 04:28am

We will explore how the shape and behaviour of some earth energy features, particularly the smaller capped vortices that are connected to blind spring networks, can change around the time of New Moon and whether this affects any of the other energies. Additionally, we will explore if and how the tree, water and earth energies that we dowsed over the last five sessions are linked together.

Wednesday 21st September 2026 THEME: AUTUMN EQUINOX

Solar Noon 12:57 Autumn Equinox 01:05 am

The day prior to the Solstices and Equinoxes is said to be a harmony day when earth energy lines come into sync with one another and the energetic features surrounding blind springs widen out for several days. We will explore whether the tree, water and earth energies that we dowsed in the previous sessions have changed at all during the Autumn Equinox period and whether this affects their behaviour during the Solar Noon and mid-afternoon transition periods.

TREE, WATER AND EARTH ENERGY DOWSING RESEARCH PROJECT 2026

FURTHER INFORMATION

The aim of the sessions is to investigate my ideas about how the energies of trees, water, earth energies, vortices, blind spring networks and landscape pentagrams may be connected and how they are all affected by the Solar Noon and mid-afternoon transition periods. We will try to prove or disprove some of these ideas and hopefully find other things as well.

Prior to each session I will email those who have expressed a wish to participate with information relevant to the theme of each session and with the various dowsing charts that we will be using.

On the day, please bring along your dowsing tools, dowsing charts and a notebook and pen so that you can record your findings and email them to me. I will then collate everyone's findings prior to the next session.

Further information about my ideas can be found on my website and on the British Society of Dowsers (BSD) YouTube channel.

This article on my website gives a summary of my ideas and links to other articles if you wish to pursue these ideas further:

[15. THE SOLAR TRANSITION EFFECT | The Sherwood Dowser](#)

This video on the BSD YouTube channel is the third in a series of three entitled "The Landscape Speaks" It outlines my ideas about how beacon trees, earth energy vortices, energy lines, the underground water in blind spring networks and the energies associated with landscape pentagrams are all linked:
